Hi Rob:

I was out of town and then on-site for the past week.

Do you have any time for a call on this during the day on Friday July 14? Thanks as always for your help.

Dave

I can meet the August 4 deadline.

It might be helpful to have an internal call to get me up to speed on current status. For instance, I recall that during excavation for the Immediate Response Action there was observed contamination breakout into the harbor. Was there any detail on where this occurred or how this might be prevented? This could be an issue to emphasize for any future excavation work on the Aerovox property.

Also, ORD management requests that we track hours spent for technical assistance to the Regional offices. If our assistance is for a specific site, then we need to document the specific site code. Could you provide a unique site code that would apply for this current review request? I just need the 8-digit site/project code.

Thanks,

Robert Ford

Hi Robert—I spoke to the MassDEP. Our initial deadline is August 11. If you could get us your thoughts maybe by 8/4 that would give us time to integrate them with everyone elses. If this is too tight a schedule or if you have other constraints or problems, please let us know. Thanks!

Dave

Hi Angela:

Just to memorialize our conversation, EPA is of course very interested in commenting on the above subject document.

Per our conversation we will aim to comment to MassDEP by August 11, 2017. Vacation schedules might require a little more time but

We will aim for 8/11.

Thanks

David Lederer
